

# Perfumes and Potions

There are lots of wonderful smelly things in the garden for making perfumes and potions....

-  Use small plastic cups and sticks for mixing.
-  Collect some potion ingredients such as little pieces of herb, vegetable leaves or garden flowers. Grass, hay and earth also make interesting smells.
-  Mix with water.
-  Try smelling a pot with your eyes shut. Would you know what it was without looking?
-  Who can make the nicest perfume? And the smelliest potion?  
You can give them names too.
