A further 3 SSSIs were confirmed without any amendment to the existing site boundary.

No SSSI notifications were allowed to lapse at time of confirmation.

12. SSSI : Referral cases considered by the Advisory Committee on SSSI during year to 31 March 2003

During the year 1 case, involving 1 objector, was referred by SNH to the Advisory Committee on SSSI under Section 12 of the Natural Heritage (Scotland) Act 1991. In addition, advice was also received on 2 cases, involving 4 objectors, referred to the Advisory Committee during 2001/02. Two cases were in respect of scientific objections to the notification of new SSSIs outstanding at the end of the three month objection period. One case (Foinaven) was in respect of an existing SSSI under the ten year rule.

All objections prior to 1999/2000 are listed in SNH Facts and Figures 1998/99. Those from 1999/2000 onwards are in SNH Facts and Figures for their respective years.

14. SSSI : Consolidated list of Sites notified under the National Parks and Access to the Countryside Act 1949, but not yet assessed under the Wildlife and Countryside Act 1981 as at 31 March 2003

When the Wildlife and Countryside Act 1981 came into force on 30 November 1981, there were 824 SSSI, covering 495,524 ha, notified under the 1949 Act. Since then 697 of these SSSI have been renotified under the 1981 Act, and 113, covering 12,311 ha, have been denotified.

As at 31 March 2003 there were 14 SSSIs, covering 2,601 ha, still notified under Section 23 of the National Parks and Access to the Countryside Act 1949, but not yet assessed under Section 28 of the Wildlife and Countryside Act 1981. These include 3 biological SSSI (covering 446 ha), 9 geological SSSI (covering 1,659 ha) and 2 SSSI of mixed interest (covering 496 ha).

No further 1949 Act SSSIs were renotified as, or amalgamated into, 1981 Act SSSIs or denotified during the year.

15. Nature Conservation Orders in force during year to 31 March 2003

Section 29 Nature Conservation Orders (NCO) are made by Scottish Ministers (previously the Secretary of State for Scotland prior to 01/07/99) after consultation with SNH, where it becomes necessary to reinforce the safeguard of land of special interest where it is either being actively damaged or there is evidence that it is under threat of damage. Recourse to the use of Section 29 Orders is a means of last resort and is used primarily to safeguard a site whilst negotiations continue to secure its future appropriate management.

No new NCOs were made during the year and no existing Orders were revoked. One existing NCO effectively became an SNCO (see Table 16).

The following table provides a full list of all ongoing NCOs in force during the year to 31 March 2003.

16. Special Nature Conservation Orders in force during year to 31 March 2003

Special Nature Conservation Orders (SNCO) under Regulation 22 of the Conservation (Natural Habitats, &c.) Regulations 1994 are made by Scottish Ministers after consultation with SNH where it becomes necessary to reinforce the safeguard of land within a European Natura 2000 site. The use of an SNCO is a means of last resort. If SNH refuses consent for a damaging operation within an area covered by an SNCO, the owner/occupier can require SNH to refer the case to Scottish Ministers to make a final decision.

In addition, Regulation 27 of the Conservation (Natural Habitats, &c.) Regulations 1994 provides that where the land covered by a Nature Conservation Order (NCO) has subsequently been designated as a European Natura 2000 site after 30 October 1994, the NCO is to be treated as if it was an SNCO.

One new SNCO was made in 2002/03 and 1 further existing NCO is now treated as an SNCO because the SSSI concerned was designated as part of a European site during 2002/03. The following table provides a full list of all ongoing SNCOs in force during the year to 31 March 2003.

17. SSSI / Natura Site damage : Cases reported during year to 31 March 2003

Owners and occupiers of SSSIs notified under the Wildlife and Countryside Act 1981 are required to consult SNH before carrying out any activity likely to damage or destroy notified features of interest on the site. Acting without consultation may result in prosecution and a fine.

In keeping with monitoring procedures implemented in April 1998, damage cases are ascribed to seven types of activity. The threshold separating 'long-term' from 'short-term' damage is three years. The key definitions used in the following tables include :

Activity : agriculture, development, forestry, recreation, sporting, other activities, and 'unknown'

Short-term damage : damaged interest features likely to recover in three years or less

Long-term damage : damaged interest features likely to require more than three years to recover

Recovery not likely : damaged interest features unlikely to recover

The following table provides information on 13 cases recorded during the year to 31 March 2003 where the damage exceeded the threshold of being over 0.5 ha in area or 100m in length or 10% of the interest feature overall, or where SNH is aware of an incident being reported to the Procurator Fiscal.

Information on 5 further cases falling below this threshold has been excluded.

29. World Heritage Sites inscribed and proposed as at 31 March 2003

World Heritage Sites (WHS) are areas of outstanding natural or cultural value internationally. They can include exceptional examples of outstanding natural habitats or superlative natural features. Sites are listed by the World Heritage Committee of UNESCO under the Convention of World Cultural and Natural Heritage adopted in 1972. A high standard of management is required before listing of a site can be considered. St. Kilda, which is owned by the National Trust for Scotland, is Scotland's only WHS designated for its natural heritage value. There are three other World Heritage Sites in Scotland, Old and New Towns of Edinburgh, Heart of Neolithic Orkney and New Lanark designated for their cultural heritage value.

Sites on the Tentative List for future submission to the World Heritage Committee have recently been reviewed. The Cairngorm Mountains (for their landform and geological features) and The Flow Country (for its natural habitats and biological diversity) have been proposed by the UK Government for future submission to UNESCO. Work is in hand to prepare a formal proposal to extend the St. Kilda site to include the outstanding marine fauna and flora to be found around these islands as well as to include their cultural heritage value. The boundary of each proposed site is subject to further consideration as each nomination is put forward. In addition to St. Kilda, there are two other Scottish sites, The Forth Rail Bridge and The Antonine Wall, on the Tentative List for their cultural heritage value.

30. Biogenetic Reserves declared as at 31 March 2003

In response to the Bern Convention ratified by the UK Government in 1983, the Council of Europe established a network of Biogenetic Reserves, to continue to conserve representative examples of European fauna and flora and natural areas. They are intended primarily for biological research, and are selected from existing NNRs. No special controls are imposed by the designation. SNH advises Scottish Ministers on appropriate NNRs for nomination to the Council of Europe. Two Scottish NNRs, covering 2,388 ha, were included in the network in 1992.

31. Biosphere Reserves declared as at 31 March 2003

Up to 19/03/02 there were 9 Biosphere Reserves in Scotland, covering an area of 28,800 ha, included in the UNESCO Man and the Biosphere (MAB) Programme, all of which were NNRs with the exception of Merrick Kells. These were nominated by the UK Government on the recommendation of the Nature Conservancy Council in the mid 1970s and declared in 1977. The UK withdrew from UNESCO between 1985 and 1997, during which time the strategy and framework for Biosphere Reserve management changed. The UK rejoined UNESCO and the DETR undertook a review of the 13 UK Biosphere Reserves to assess how well they stand up against the new strategy.

Following the DETR review, SNH has recommended that Rum, Caerlaverock, Claish Moss, and St Kilda be delisted due to the difficulty of reconciling these sites with the UNESCO criteria for Biosphere Reserve designation. A formal recommendation for delisting these four Biosphere Reserves was presented by the UK Government to UNESCO on 19 March 2002. These Reserves are now delisted.

This leaves five Biosphere Reserves, covering 11,199 ha, at which the potential for the sustainable development role, envisaged for these reserves under the Seville criteria, will be examined further. There is still the potential for the identification of additional Biosphere Reserves in Scotland.

32. European Diploma Areas as at 31 March 2003

The Diploma is awarded by the Council of Europe in recognition of exemplary management and protection of areas of outstanding nature conservation and landscape importance, where this includes social and recreational attributes. It is awarded for a period of five years under one of three categories:

Category A : large natural areas in Europe which are not much affected by man and where the aim is to protect the natural heritage, the ecosystems and the wildlife;

Category B : areas where the overriding consideration is to protect the landscape and preserve the areas in their present state;

Category C : areas whose social and recreational function is successfully combined with maintaining their biological or aesthetic features.

Scotland has two European Diploma Areas, Beinn Eighe in category A and Fair Isle in category C.

During July 2002, an expert nominated by the Council of Europe, carried out the on-the-spot appraisal for Beinn Eighe's Diploma which is due for renewal in 2003 for the period 2003 - 2008. The expert's report recommended renewal, but at 31 March 2003 SNH had not yet received official confirmation that the Diploma had been renewed.

33. Inventory of Historic Gardens and Designed Landscapes as at 31 March 2003

The following table combines information on 275 sites listed in 1987 within the "Inventory of Gardens and Designed Landscapes in Scotland" with information on additional sites identified in the Lothians and in the Highlands & Islands as part of SNH's and Historic Scotland's review on the extension of the Inventory. The Inventory provides a representative sample of some of the most important historic gardens and landscapes in Scotland including private gardens, parks and policies in country estates, public parks, cemeteries, and botanical gardens.

Supplementary Volume 1. Lothians published in 2001 added 18 sites and updated the Inventory entry of one existing site. Supplementary Volume 2. Highlands & Islands published in March 2003 added 35 sites and updated the Inventory entry of one existing site. These supplements bring the total area of the 328 Inventory sites up to 66,765 ha. Work on the extension of the Inventory is continuing and Supplementary Volume 3, Fife is due to be published in 2004.

The Town and Country Planning (General Development Procedure) (Scotland) Order 1992 (GDPO) and Circular 6/1992 puts an obligation on planning authorities to consult SNH and Historic Scotland on any developments affecting 1987 listed Inventory sites. It is expected that a similar requirement will follow for new sites identified in Supplementary Volumes to the Inventory at the next revision of the GDPO.

34. National Scenic Areas designated as at 31 March 2003

National Scenic Areas (NSA) represent nationally important areas of outstanding natural beauty and comprise some of the best examples of Scotland's finest landscapes. They were first identified by the Countryside Commission for Scotland (a predecessor body to SNH) in their report on "Scotland's Scenic Heritage" in 1978 and confirmed by the UK Government through the issue of Circular 20/1980. National planning policy for NSAs is set out in NPPG14 on the Natural Heritage. SNH is required to be consulted on specific categories of development within these areas.

There are currently 40 NSAs covering a land area of approximately 1 million hectares, extending from the Solway Firth to Shetland.

In 1997 Government invited SNH to review the NSA designation. Following a wide ranging consultation exercise, SNH published its advice to Government in October 1999, setting out how the effectiveness of the designation might be improved and how the present series might be expanded. The Scottish Executive is still considering the detail of SNH's recommendations. In the meantime SNH has piloted the development of NSA Management Strategies for Wester Ross and the three Solway coast NSAs in partnership respectively with the Highland Council and Dumfries and Galloway Council. These pilot Strategies were completed in winter 2002/03.

It is expected that in due course the NSAs within the new National Parks will be subsumed into that designation, and that National Park plans will provide the basis for policies to safeguard the landscape values identified by NSA designation.

35. Regional and Local Landscape designations as at 31 March 2003

A range of other mainly non-statutory designations are used locally to identify areas of landscape or other natural value. Most of these other 'designations' have been created by local authorities through the development plan system. Almost all are not designations in the formal sense of being areas of land or water identified for their special value through a process which has a statutory basis. These non-statutory listings mainly identify places or special features thought to have local or regional importance by their originators, without necessarily having the standing to be incorporated into the more formal national designation series. In some cases, in development plans, they present a zoning approach to policy determination.

One such designation, Area of Great Landscape Value (AGLV), does however have more formal status derived from SDD Circular 2/1962. This advised local authorities to designate areas of outstanding scenic interest to safeguard their future, in particular, areas which can be described as being vulnerable to pressures for development. This designation has been used widely and is referred to in around half of all development plans for rural areas. But there is no consistent basis at present to the use of this designation and Councils take different approaches according to their own needs.

In addition, around 23 other 'designations' are in use to identify local scenic resources for development plan purposes. Some of these have the word 'Regional' in their title, and are an inheritance from the past arrangements for structure planning and in one case, as in the use of the label Regional Scenic Area (the next most used title), reflect an earlier intention that the National Scenic Area be complemented by a second tier Regional Scenic Area designation, but the arrangements for this were never put in place. Many of the other local designations for landscape are local creations as part of zoning policy in development plans.

More details about these designations and their use may be found in SNH Review Series Report No. 134 Review of the role of the National Scenic Area and other landscape designations in the Scottish planning system (published 2000). In the second half of 2003 SNH intends to review these designations with SE and COSLA with the view to preparing advice to help promote consistency in approach to the identification of these areas.

36. National Parks designated as at 31 March 2003

Scotland's first National Park in Loch Lomond and The Trossachs was designated on 25 April 2002 under the National Parks (Scotland) Act 2000. It was formally opened by HRH Princess Anne on 24 July 2002. Scotland's second National Park in the Cairngorms was designated on 7 January 2003. While the Cairngorms National Park Authority was established on 25 March 2003, it will not become fully operational until 1 September 2003 and a formal opening of the Park is not expected before then.

SNH has been closely involved in the designation process for both Parks, acting between 2001 and 2002 as the official reporter under Section 3 of the National Parks (Scotland) Act 2000 and also providing further advice to Ministers and the Scottish Parliament on the designation order process which followed for both Parks. Earlier in 1999, SNH also advised Government on proposals for National Parks which became the basis of the enabling legislation passed by the Scottish Parliament in 2000.

Both of Scotland's new National Parks cover areas of quite different character. The Loch Lomond and The Trossachs area has a very diverse landscape of lochs, forests and hills located close to the main centres of population in the Scottish lowlands. In contrast, the Cairngorms mountains are the largest and most remote upland area in the UK. Both areas are nationally important for their nature conservation, landscape and outdoor recreation interests, as recognised by the high number of national and European natural heritage designations they contain. They are also both 'lived-in' landscapes, important for some of the natural resources they provide and also to the people who live in these areas and make their living there. Reflecting this, Scottish National Parks have a wider set of aims than many Parks elsewhere and their role in promoting the sustainable social and economic development of their local communities, while safeguarding the outstanding natural and cultural heritage of the area, is explicitly recognised in legislation.

37. Regional Parks designated as at 31 March 2003

Regional Parks, designated under Section 48A of the Countryside (Scotland) Act 1967, are extensive areas of the countryside, which provide for the co-ordinated management of informal recreation alongside and in close collaboration with the management of other land uses in the area. The four Regional Parks in Scotland, extending in total to 86,160 ha, were established by the former Regional Councils and confirmed by the Secretary of State for Scotland. Management of the Parks has now transferred to the new Local Authorities.

It is expected that Loch Lomond Regional Park will eventually be de-designated following the implementation of proposals by the Scottish Executive under the National Parks (Scotland) Act 2000 to create a National Park for Loch Lomond and The Trossachs.

38. Country Parks registered as at 31 March 2003

Since 1969, 36 Country Parks have been established by Local Authorities under Section 48 of the Countryside (Scotland) Act 1967, and included in the Register established by the Countryside Commission for Scotland, covering a total area of 6,481 ha.

Country Parks are relatively small areas, readily accessible to the public at large, which are actively managed to provide opportunities for people to enjoy the countryside and informal open air recreation. The range of facilities provided varies from site to site, but all Parks are supported by built facilities and by opportunities to picnic or walk and by programmes of organised events. They are also supported by a Ranger Service to promote visitor enjoyment and understanding of their natural qualities. The majority of Country Parks are owned or managed by Local Authorities with the support of SNH.

42. Marine Consultation Areas listed as at 31 March 2003

In 1986 the Nature Conservancy Council published a list of 14 coastal marine areas in Scotland that had been identified as deserving particular distinction in respect to the quality and sensitivity of their marine environment and where the scientific information available substantiated their nature conservation importance. In 1990 the original list was reviewed and a further 15 areas were added in the light of further survey work, including the current Marine Nature Conservation Review.

The areas have no statutory locus, but are made known to bodies with which SNH consults on marine conservation issues.

There are currently 29 Marine Consultation Areas, covering 111,895 ha, listed as at 31 March 2003.

45. National Nature Reserves : Consolidated list of NNRs declared as at 31 March 2003

Consolidated list of 73 National Nature Reserves (NNRs) in Scotland as at 31 March 2003, covering 131,139 ha, declared by SNH, or one of its predecessor bodies, under Section 19 of the National Parks and Access to the Countryside Act 1949 or Section 35 of the Wildlife and Countryside Act 1981.

Four NNRs, covering 14,867 ha, are wholly or partly managed on an Approved Body basis. The management of 70 NNRs, covering 116,272 ha, is led by SNH.

There are no Marine Nature Reserves (MNRs) in Scotland. An MNR, established under Section 36 of the Wildlife and Countryside Act 1981, is analogous to an NNR for managing marine sites in British waters.

- 2 Land secured by SNH in terms of Section 16 "to be managed as a Nature Reserve", but outwith the formally declared boundary of the Reserve.
- 3 Difference between declared area and total area of supporting interests [Owned, Leased, or NRA] in these cases reflects the use of a different basis of measurement for the declared area.
- 4 Difference between declared area and total area of supporting interests [Owned, Leased, or NRA] in these cases reflects a lapsed Lease or conversion of the Lease or NRA into a Section 15 agreement.
- 5 Where NNR covers more than one discreet area, a central grid ref is listed for each discreet area.
- 6 Data reflect overlapping interests - vis NRA with tenant of SNH owned land or overlapping NRA.
- 7 Ariundle Oakwood NNR and Glencripesdale NNR were formerly part of Loch Sunart Woodlands NNR between 1979 and 1993.
- 8 Leased (ha) figure for Caerlaverock NNR is approximate area only.
- 9 Cairngorms NNR is covered by both a NRA and Section 49(A) agreements.
- 10 Loch Leven NNR is part managed by RSPB and part managed by SNH.
- 11 SNH also owns Rhynie Chert SSSI, 8.4 ha, in Aberdeenshire.
- 12 The 412 ha of land on Islay owned by SNH at Castlehill is not within the Eilean na Muice Duibhe NNR.
